INSPIRED BY NATURE

TRI-D sintered stone is a **new category of products** by Ceramika Paradyż which delight with their natural beautiful designs. Importantly, they are 100% made from natural materials, including quartz, feldspars, clays or kaolins.

TRI-D sintered stone is an excellent alternative to other natural materials not only because of its aesthetic value but also the environmental protection even after it reaches the end of their useful life. It follows the trend of responsible use of decreasing natural stone deposits.

ECO-FRIENDLY

SUPREME QUALITY

Cutting-edge process of pressing and baking the compound at 1200°C and also **production following strict rules and quality standards** enabled to get a material with optimum parameters, including **extraordinary strength and extreme resistance**.

Thanks to that a highly practical and yet beautiful product resistant to all sorts of adverse factors, including scratching, discolourations, high temperature or chemicals was made.

QUALITY

UNIVERSAL APPLICATION

TRI-D sintered stone comes in two really **large sizes**, i.e. **160 x 320** and **123 x 320 cm** and in **two thickness values: 2.0 and 1.2 cm**. It is thanks to the tile size and unique properties that sintered stone is a highly universal material.

It is great **for kitchen tops and islands, wall and furniture cladding, window sills, floors or other elements** of modern and functional interior design. Its use is limited solely by the designer's imagination.

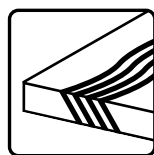

UNIVERSAL

BEAUTIFUL IN EVERY DETAIL

Ceramika Paradyż is the first manufacturer in Poland and one of the few worldwide to manufacture TRI-D sintered stone 2 cm thick **with lines** visible both on the surface and **throughout the entire tile cross-section.**

Thanks to that, sintered stone may be machined using the technology used for natural stone, achieving similar, equally **decorative effect at the tile edge.**

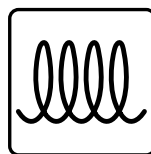

LINE EFFECT

RESISTANT TO TEMPERATURE

TRI-D sintered stone is resistant to extreme temperatures which makes it perfect for **fireplace cladding or kitchen tops** exposed to high temperatures. This allows you to place hot pots when you cook or use an induction cooker integrated with TRI-D sintered stone.

A practical modern function of 1.2 cm sintered stone is **the possibility to use induction systems integrated with the hob hidden beneath them**. Thanks to that, the kitchen top becomes a uniform, elegant surface easy to keep clean.

INDUCTION

ENTIRELY PRACTICAL

The precise manufacturing process allowed to create a really strong material. Sintered stone structure is free from any micropores thanks to which it **does not absorb moisture or dirt**, and all stains and soiling can be easily removed with a sponge and a mild cleaning agent.

It can be cleaned without any risk of damaging the tile or causing its discolouration. Its supreme **resistance to wear and scratching, UV rays or changes even during heavy everyday use** is confirmed by a **30-year guarantee** of the manufacturer (for details see the guarantee certificate).

CONSISTENT DESIGN

TRI-D sintered stone goes nicely with a broad range of large-size tiles and terrace tiles 2.0 by Ceramika Paradyż in terms of colours and designs. Thanks to that, you can create consistent-style space both indoors and outdoors which makes this product unique on the market.

SINTERED STONE

HORIZON TRI-D GOLD

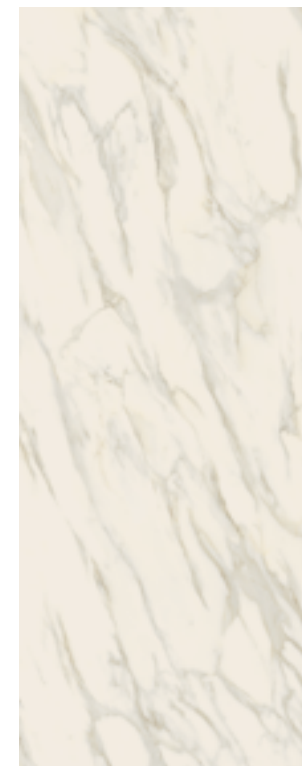

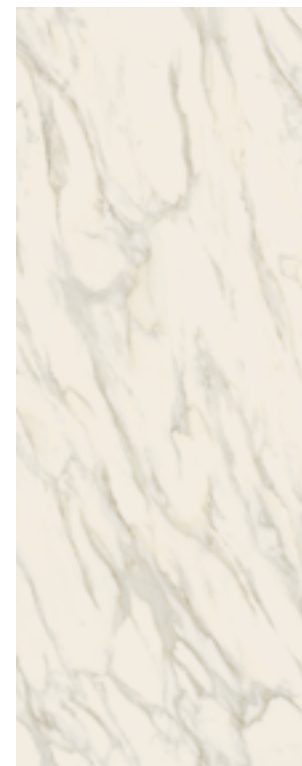

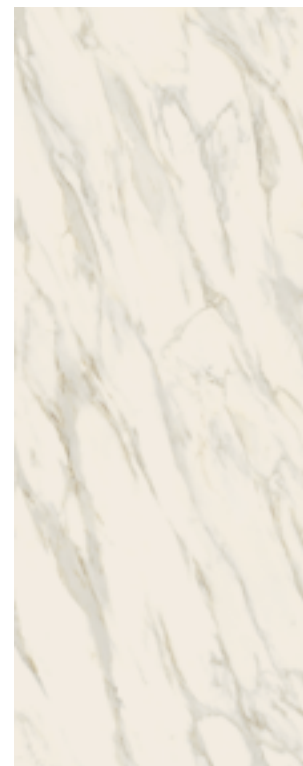

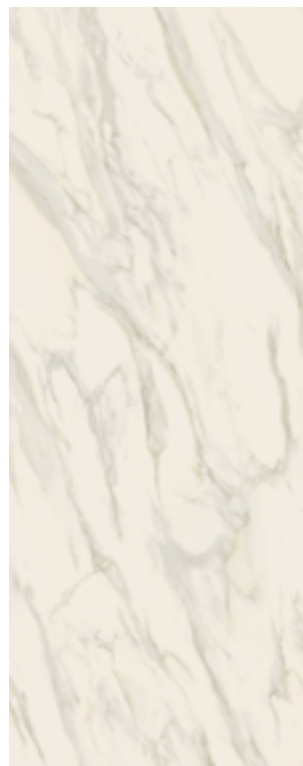

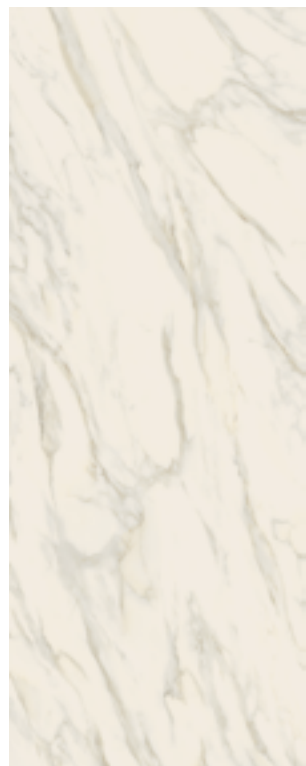

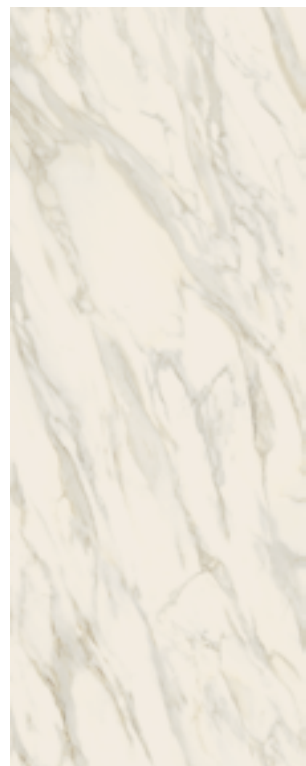

The pattern inspired by calacatta stone, perfect for ageless interior designs. It attracts attention with its warm colours and flowy grey lines which intertwine with golden beige.

Combined with HORIZON GOLD large-size tiles, sintered stone makes harmonious surfaces stressed with interesting details, including e.g. a line mirroring the beauty of natural marble. The choice of soft and polished surface finishes ensures the ability to adapt to every style and interior.

SINTERED STONE

HORIZON TRI-D GOLD

HORIZON TRI-D GOLD collection is made in two thickness sizes, i.e.: 2.0 and 1.2 cm which differ slightly with the line pattern. The 1.2 cm tiles have 6 different, repetitive patterns contrary to 2.0 cm ones where the pattern is random and non-repetitive.

SINTERED STONE

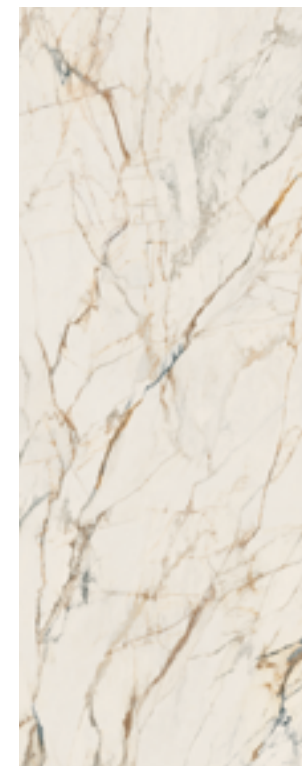

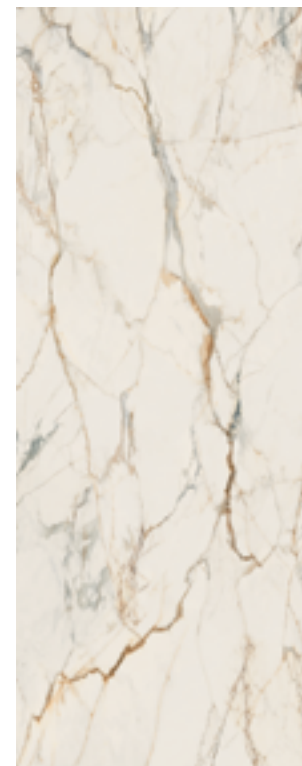

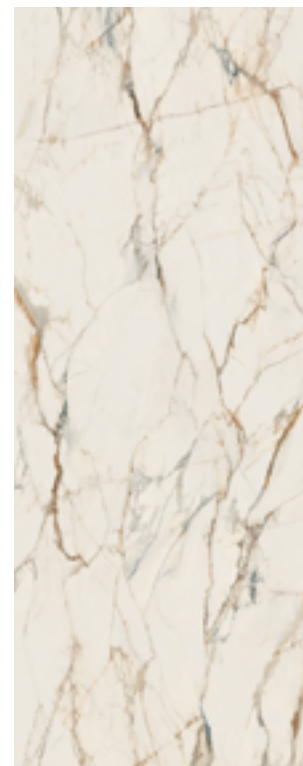

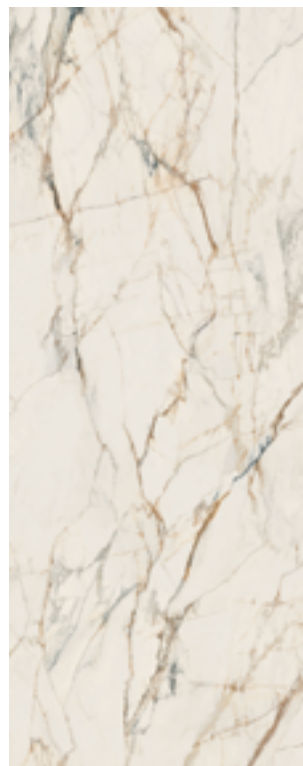

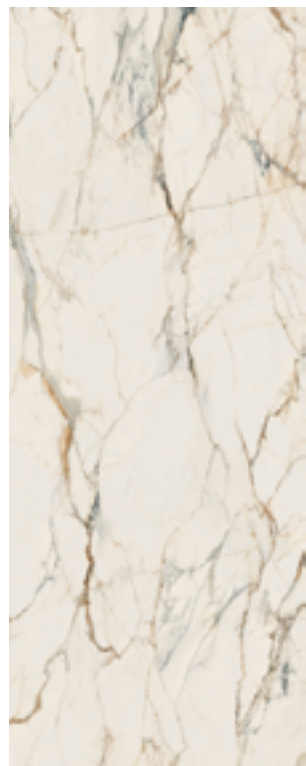

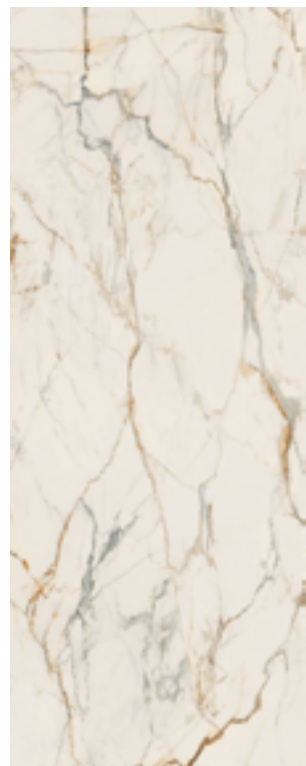

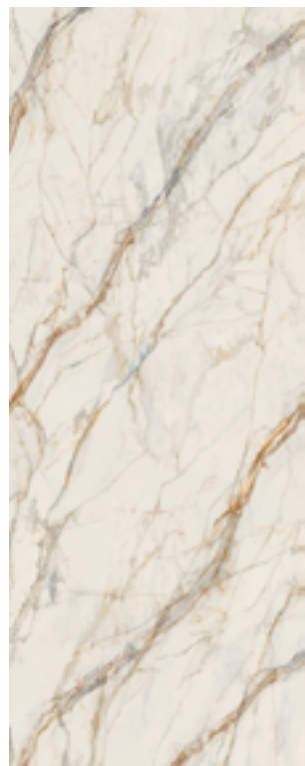

PASSION TRI-D WHITE

The collection is inspired by the legendary calacatta stone with a satin surface. The non-banal pattern with expressive design and numerous brown touches in the lines combines the style of calacatta oro and crema and brings to mind hot Mediterranean holidays. The cross-section of 2 cm sintered stone displays the line continuing the surface pattern, a decorative magic enclosed in wonderful colours.

SINTERED STONE

SINTERED STONE

ABSTRACT TRI-D RUST

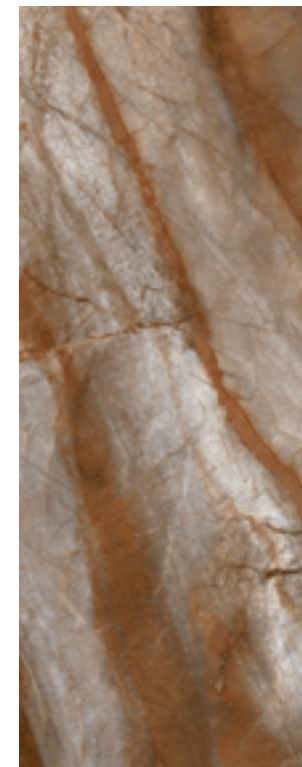

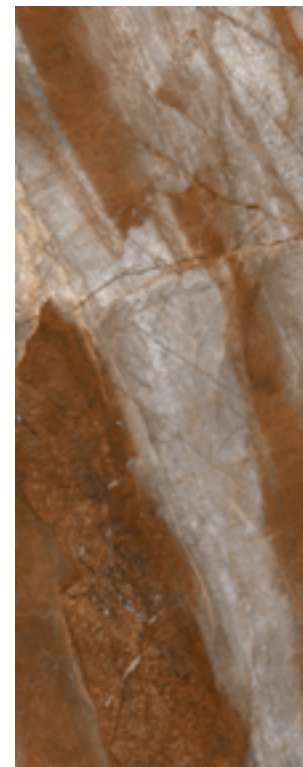

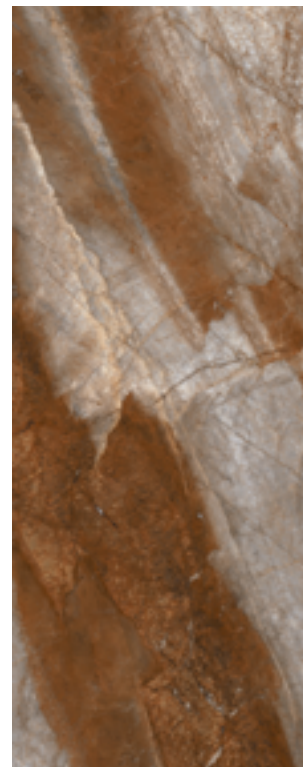

Hot earth tones, intense ginger with pearl details, down to deep brown. Those various effects are expressed best in the depths of the pattern with a satin finish. ABSTRACT RUST is not just a perfect dominant of smart living-room walls but also a perfect companion of warm concrete and wood. It can be used in bathrooms, kitchens or living rooms.

SINTERED STONE

ABSTRACT TRI-D RUST

ABSTRACT TRI-D RUST collection is made in one thickness i.e.: 1.2 cm with 5 different, repetitive patterns.

thickness: size:

SINTERED STONE

PEROLLA TRI-D GREEN

A collection with an absolutely inimitable structure. Clear tiny dots immersed in the sintered stone create the effect of a natural stone cross-section. What is more, the mixture of far-from-obvious colours, including green, light blue, orange and white, was complemented on the surface with a natural stone picture which offers extra depth to the eye. This effect is improved by tiny dots glistening on the matt surface finish.

SINTERED STONE PEROLLA TRI-D GREEN

PEROLLA TRI-D GREEN collection is made in two thickness sizes, i.e.: 2.0 and 1.2 cm which differ slightly with the pattern. Both thickness size offer 3 different, repetitive patterns.

thickness: size:
2,0 cm 123 x 320 cm

thickness: size:
1,2 cm 123 x 320 cm

SINTERED STONE

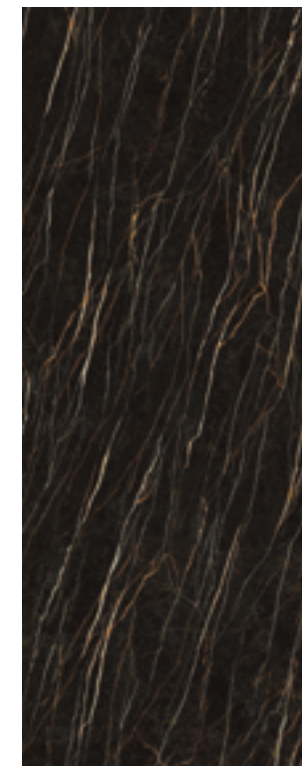

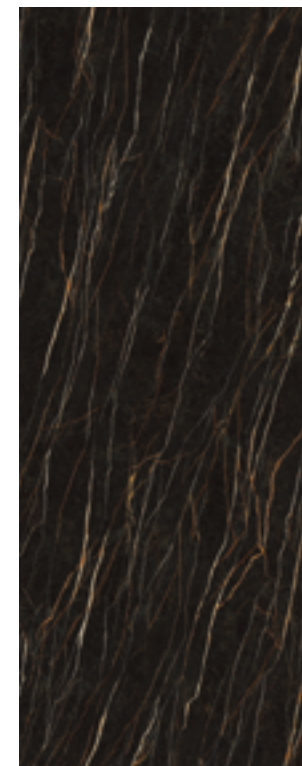

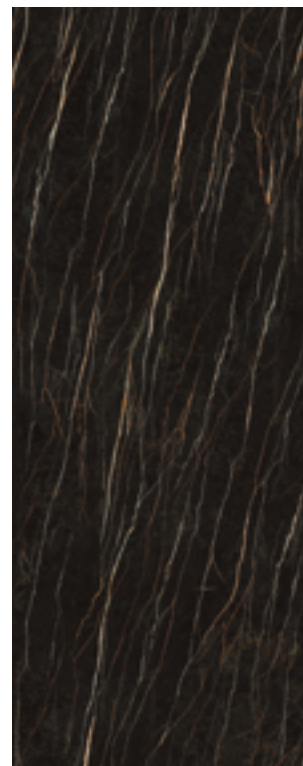

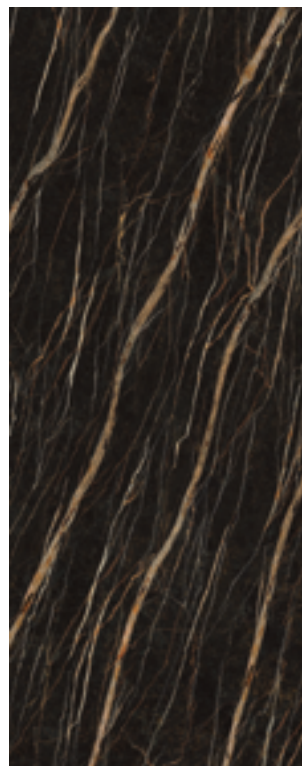

PLEASURE TRI-D BROWN

Large-size natural elegance inspired by Saint Laurent stone. The characteristic rusty lines and tiny details on the chocolate brown background create the natural stone effect and a true representation of its natural texture. The sintered stone goes well with e.g. light furniture fronts, wood and cement, and also matt large-size tiles PLEASURE BROWN.

SINTERED STONE

PLEASURE TRI-D BROWN

PLEASURE TRI-D BROWN collection is made in two thickness sizes, i.e.: 2.0 and 1.2 cm which differ slightly with the line pattern. The 1.2 cm tiles have 6 different, repetitive patterns contrary to 2.0 cm ones where the pattern is random and non-repetitive.

SINTERED STONE

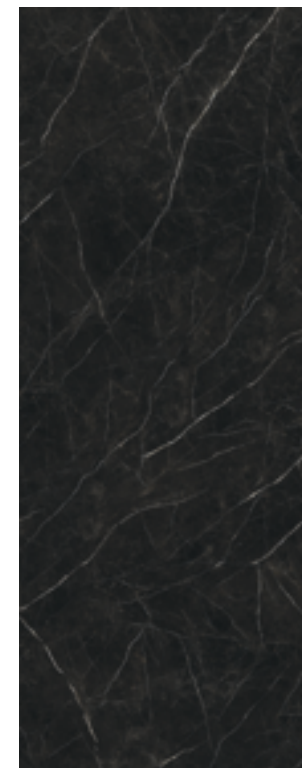

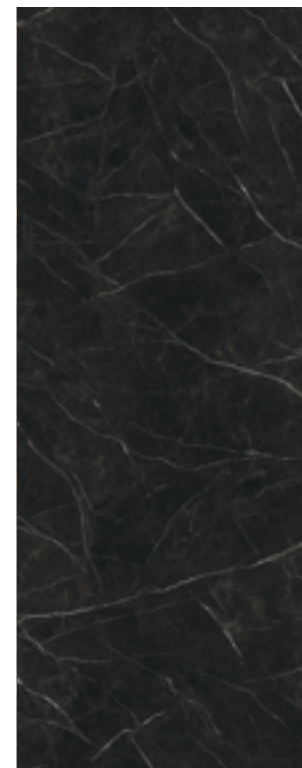

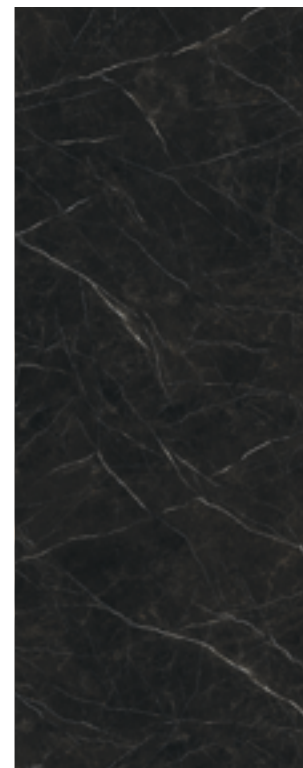

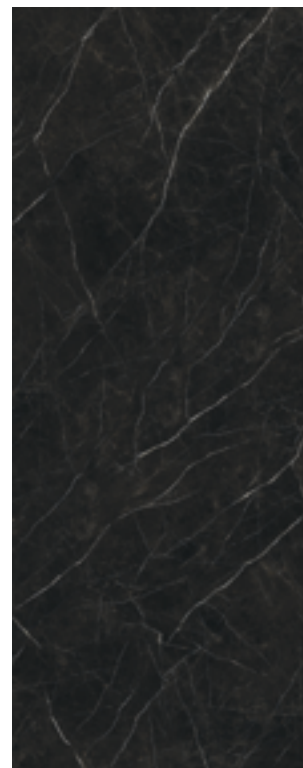

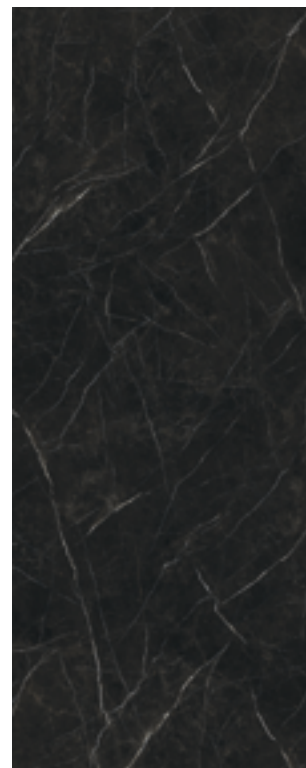

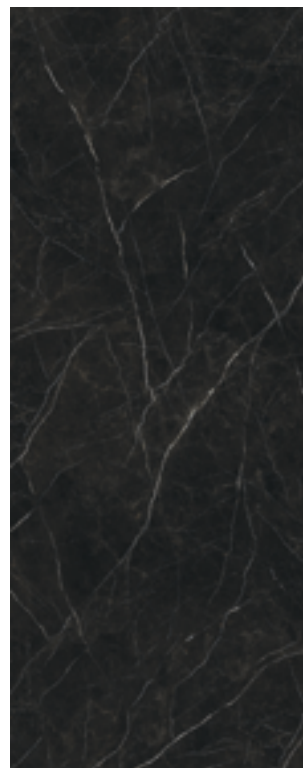

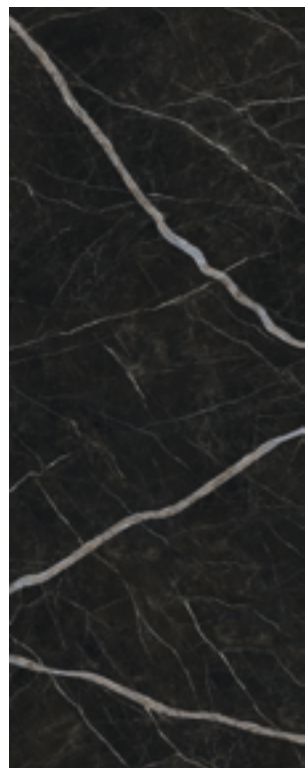

DESIRE TRI-D BLACK

The naturally elegant DESIRE BLACK collection is inspired by nero marquinia stone. Deep black meets white cut lines while glistening lines offer the 3D effect on the satin surface. The lines crossing the 2.0 cm sintered stone emphasize the natural stone effect. DESIRE TRI-D BLACK sintered stone goes perfectly well with wood, cement or white calacatta or statuario marble.
